

STEELDAY

OCTOBER 24, 2025

Join Us for Steel Day at High Steel Structures

Each fall, High Steel proudly hosts Steel Day as part of the AISC's nationwide STEELDAYS celebration. It's our signature event that brings together bridge construction professionals for a dynamic day of learning, connection, and fun!

We will kick off the morning at 8:00 AM with a light breakfast followed by a technical session led by Ronnie Medlock, PE, High Steel's VP of Technical services. As the 2025 recipient of the American Institute of Steel Construction's T.R. Higgins Lectureship Award, Ronnie will deliver a lecture entitled "Achieving Excellence in Structural Steel."

Then unwind with a BBQ picnic and enjoy guided tours of our state-of-the-art fabrication facilities and hands-on welding demos. Whether you're interested in networking, deepening your technical knowledge, or simply want to celebrate the craft of steel bridge building—Steel Day delivers.
